

DPG Fall Meeting

of the Deutsche Physikalische Gesellschaft

Quantum Science and Information Technologies

**Joint Meeting of the
Atomic, Molecular, Plasma Physics and Quantum Optics Section (SAMOP)
Condensed Matter Section (SKM)
Matter and Cosmos Section (SMuK)**

The German Physical Society (DPG) is launching a new meeting format dedicated to a research theme identified by its three sections. The *first* DPG Fall Meeting addresses Quantum Science in its relation to Information Technologies, and provides a forum for cross-disciplinary discourse between condensed matter and AMO physics, information science and quantum technologies, applied and fundamental research. Rapid developments in a priori distinct fields, from artificial intelligence to the first small-scale quantum computation platforms, dedicated efforts in academia as well as in industrial research, and an intensifying public debate on the diverse aspects of these truly revolutionary emerging technologies, necessitates an accentuated and concerted scientific exchange across disciplines. We look forward to bringing together key players from academia to industry, senior and junior researchers, and the interested public, to engage in this endeavour.

Save
the Date!
**September
23-27, 2019**
University of
Freiburg

#DPGFR19

Local Organiser:

Prof. Dr. Andreas Buchleitner
Dept. for Quantum Optics and Statistics
Physikalisches Institut
Albert-Ludwigs-Universität Freiburg
freiburg19@dpg-tagungen.de

Conference Venue

Albert-Ludwigs-Universität Freiburg
Kollegiengebäude I
Platz der Universität 3
79098 Freiburg
